Height to rack	60.0 inches	1524 mm
Height to tent	70.5 inches	1791 mm

\*Payload includes all options and features added to the base trailer plus water and fuel storage.

Gasoline weighs 6.25 lb per gallon

Gasoline weighs 0.7372 per liter

Water weighs 8.35 lb per gallon

Water weighs 1 kg per liter

When packing your trailer place the heaviest items on the bottom of the load box. Split your cargo weight 60% forward of the axle and 40% behind it. Use stackable packing containers to store non-perishable food stuffs and smaller items. Strap your loads down using the tie downs and tie down taps within the load box to stop the load from shifting during travel.
